| RE: permit fee coupons | |

Lynn,

These are 5 projects I'd like to ask you about before paying.

The Blawn 1-4 Exploration, E010149, as we talked about on the phone, Interstate Brick has no association with this. My guess is that the Peck's are doing this in association with clay for a cement plant. We've looked at samples from people from this area, but to the best of my knowledge have never done any exploration or purchased anything from the Blawn Mtns.

North Slope, S490028. As we talked about I think this is the Peck's. My guess is it is near our Allred property. I've never seen or heard of "north slope" until you mentioned it. Interstate has not been associated with this since I've been doing this job (2002). It is also outside our lease area with the Allred Family. I think this also is a project belonging to the Pecks and not associated with our brick manufacturing.

Teraza, E490043, and Big Red, E490044, were project explored by ISB prior to my involvement starting in 2002 also. We'd like to close these out also and request they be done. We can pay the fee if we need to, although if possible I'd like to arrange for an inspection of these with yourself and me and Frankie to see what, if anything, needs to be done.

The Wells Canyon - Manning 1-3, E490042, was reclaimed a couple years ago. Yourself and Me and Frankie inspected that the first fall after the seeding. We later received the attached letter from the BLM stating that this was closed with them because it was satisfactorily reclaimed. So, hopefully this one can be closed without further inspection.

I will be away from the office July 17-21. Frankie can be reached at 801.301.6729 if he can help. Otherwise I will see you sometime after the 21st.

Thank you.
John Hewitt

Dear Mr. Hewitt:

On September 23, 1997, we received an incomplete Notice from Interstate Brick (IB) to conduct exploratory trenching operations in the Wells Canyon area located in T. 6 S., R. 3 W., Section 27. Before IB provided sufficient information so that the Bureau of Land Management could consider the Notice complete, the trench had been excavated by IB. Since that date, IB has reclaimed the trench and we have been awaiting successful revegetation of the surface disturbance associated with the subject trenching activities.

An inspection of the area was conducted by this office on May 24, 2005. The inspection revealed that the site has been reclaimed satisfactorily and shows good revegetation growth in areas that were previously barren of all vegetation. We appreciate IB's continued efforts to reclaim the unauthorized trench. We are hereby closing the subject casefile.

If you have any questions, or require additional information, please feel free to contact Michael Ford of my staff at (801) 977-4360.

Sincerely,

David H. Murphy
